

The Swedish Felt course is supplied in ready assembled fairways for either portable or permanent installation. This enables the course to be ready for almost immediate use and it can also be moved for indoor use during the winter months if required.

The course is ideal for use in parks, holiday centres, caravan sites, etc., and 18 holes can easily be accommodated in an area of 1200 square metres. Each fairway is constructed from sturdy pressure-treated timber and playing surfaces are covered with all-weather green minigolf carpet. Units are 0.9 metres wide and vary in length from 6 metres to 18 metres according to design.
